# FIND RESOURCES AND MORE

The screenshot shows a web browser window with the URL `climateinsight.ca`. The page header includes the Climate Insight logo and navigation links: Solutions Finder, Map, Library (active), Learn, Support, and EN | FR. The main heading is "LIBRARY". Below it, a text block states: "Here you'll find resources, tools, case studies, and other materials related to climate change and infrastructure. Click on filters below to get started." A filter section on the left is titled "Filters: Select all that apply" and includes: "Climate Consideration" (expanded to show Risk / Hazard: Flooding, Extreme Heat (checked), Permafrost Thaw, Wildfire), "Infrastructure Asset Type" (expanded), and "Resource Type" (expanded to show Case Studies, Codes, Standards, Guidelines (checked), Tools, Infrastructure Options). A "Reset" button is at the bottom left. On the right, search results are shown: "Showing 1 - 7 of 7". Three results are visible: 1. "Code, Standard, Guideline: A23.3-14 Design of concrete structures" with a description about the National Building Code of Canada. 2. "Code, Standard, Guideline: CSA C22.1:24 Canadian Electrical Code, Part I (26th Edition), Safety Standard for Electrical Installations" with a description about electrical work. 3. "Code, Standard, Guideline: CSA S478-19 - Durability in Buildings" with a description about building durability criteria.
