Lesson 1 – geohazard assessment of ~2000 properties required urgent practitioner support to community-led response – with emergency assessments refined into detailed work for recovery.

Lesson 2 – Development policy is tested after wildfire – mapping regional baseline risk before the fire and using consistent criteria to re-assess changed conditions will accelerate policy decisions.

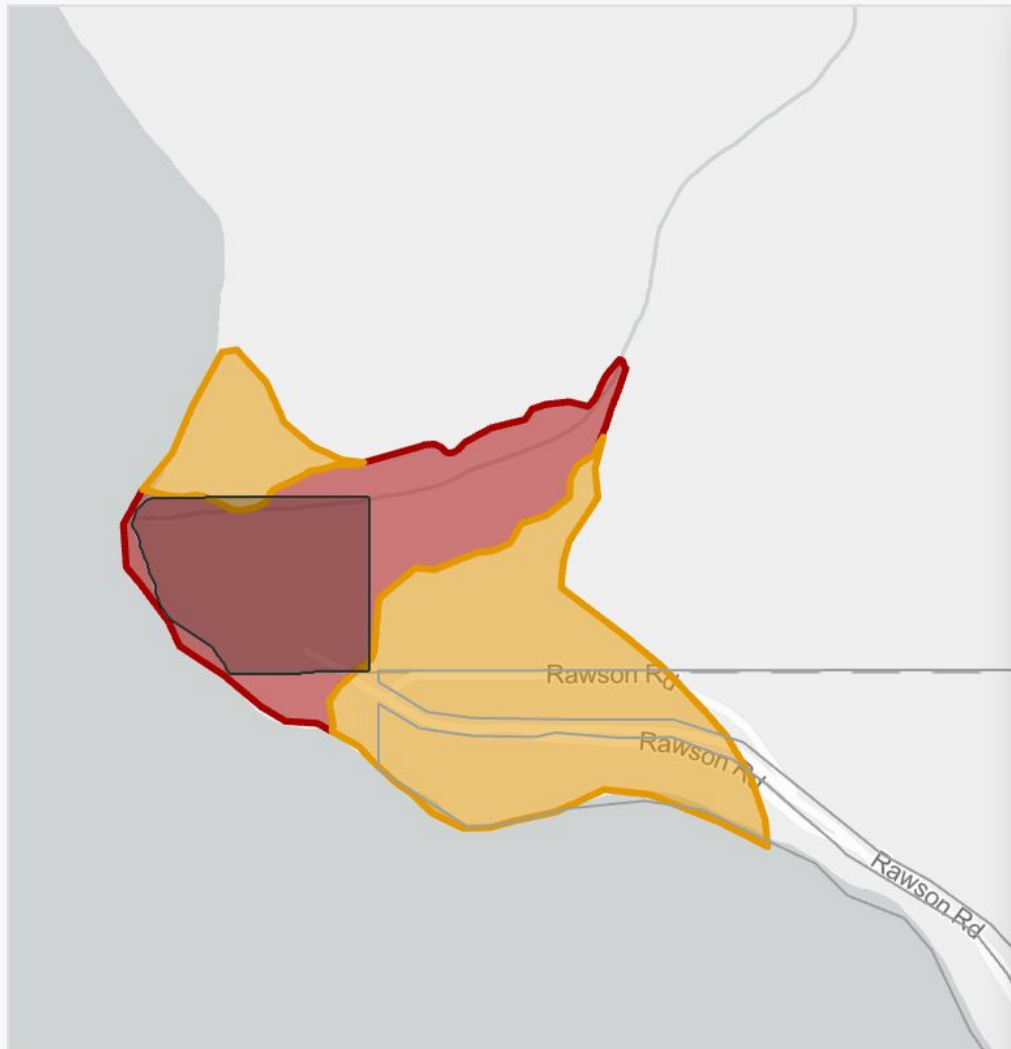

Use the **Magnifying Glass**  on the right to **search for a property**.

The **Risk Zone** your property is in is displayed in the property information.

Post-Wildfire Geohazard Risk Assessment (2024)
[Download Report](#)

Hazard Zone: Red
Address: 2992 Rawson Rd
PID: 014-299-755

Geographical Area: Adams Lake East
Inundation Likelihood: Deep (> 1 m) and fast-moving (>2 m/s) debris flows are expected to reach buildings.
Potential Damages: Building damage may cause fatalities

Lesson 3 – *implementation* makes or breaks disaster risk management. How work is delivered is just as important as the work.
